Touch screen application for Tablet PC

## Service at your fingertips!

Introduce your customers to the touch screen era with Resto'Touch for Tablet PC. Offer modern service and promote the quality of your establishment.

- **No waiting time for your customers!**  
Clients choose their meals independently.
- **Increased attendance and turnover** at your restaurant!
- **A happy, loyal** customer base.
- **Time savings for your staff:** facilitates menu selections, reduces service time and enables staff to focus on guests and their needs.
- **A modern, innovative, differentiating service** for any establishment.

# Resto'Touch for Tablet PC : serve a magical experience to your customers!

Are you chic and trendy ? Do you run a restaurant, bar, or brasserie?

- You can define **several menus**: regular menus such as lunch and dinner but also customized menus for special events like weddings, birthday parties, etc. All menus are accessible in a simple, fun and interactive manner.
- The application allows you **to define several courses** (starters, main courses, desserts) as well as à la carte service.
- An image and a full description are available for **each dish**.
- Different **criteria** help customers choose their order: products are sorted and based on personal preference (vegetarian meals, preparation times, number of calories, etc.). Thanks to the basket function, customers make choices directly onto the Tablet PC. Waiters simply have to serve the order!

## Add-on modules

To expand your range of services and meet customers' needs more effectively, a variety of modules are available :

### News

Offer customers the very latest information : the date, time, weather and latest news (RSS feeds) appear directly on the welcome page.

### Content

A fun, interactive presentation for your establishment or for business partners, complete with brochures, photos and videos.

### Mapping

List up to 100 nearby points of interest (places, monuments, shops, etc.) on an interactive map using the latest Bing Maps technology.

### Web browser

Let your customers surf the web, offering up to 10 sites which you choose and authorize. A secure way to give Internet access to your customers!

**Bring a touch of class into any establishment with the Resto'Touch TPC solution for Windows 7 Tablet PC, by offering all of these exclusive services!**

### Content management system

**Complete freedom to manage content on your own**

We provide our software on a turn-key basis, equipped with extranet in order to allow complete freedom in adding or modifying any content of the application (dishes, beverages, points of interest, etc.).

One can update the database quickly and easily : any change from the back office (extranet) affects all of the Tablet PCs.
