Microsoft® Surface® CERTIFIED

Service at your fingertips!

Introduce your customers to the touch screen era with Resto'Touch. This state-of-the art application enables you to provide modern service to your customers and to promote the quality of your establishment. This new innovative tool offers you unlimited possibilities:

- No more waiting time for your customers.

- A happy, loyal customer base.

- An increased attendance and turnover at your restaurant.

- Time savings for your staff.

- A modern, innovative image for your company.

- A unique differentiating service.

Resto'Touch: serve a magical experience to your customers!

Do you run a restaurant, a bar or a brasserie? Is your establishment chic and trendy?

Do you strive for excellence? Are you in constant search of something new? Are you looking for the best for your guests?

Resto'Touch, our exclusive 4-in-1 application for the Microsoft® Surface® multi-touch unit, will delight your guests with its features!
The unit brings a hint of modernity to your establishment and your customers will be amazed by its magic interface. This intuitive application is easy to use and adapted to every user.

For an incomparable service that will distinguish your establishment as one of the places to be!

Resto'Touch innovative features

Interactive direct ordering

Highly intuitive, this feature allows **up to 4 persons** to **directly order from the table,** displaying photographs of all meals, appetizers and wines in a playful way. Customers have access to all the details of the menu directly on the unit, with the simple touch of a finger! Once the order is validated, it is instantly sent to the kitchen for preparation.

Virtual wine waiter

Your virtual wine waiter will **greet your customers and advise them on your selection.** Videos, photographs, detailed characteristics (origins, vinery, etc.), everything is done to guide them to the best choice of wine to suit their meal, just like a professional oenologist would do. Thanks to **object detection,** the bottles placed on the unit will be recognized and their details will appear on the screen.
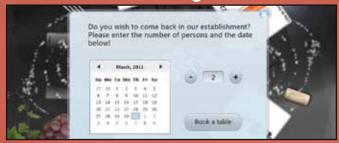

Interactive tourist guide

Thanks to the 2D and 3D tourist guide, you can offer your guests the opportunity **to discover your region and its key tourist sites and monuments** as well as your partners, with the support of every kind of useful information on landmarks and other partner locations (prices, opening hours, historical summary, accessibility,etc.).

Reservation and calling a waiter

To optimize your service, your guests can **call a waiter with a simple touch,** making interactions faster and easier. They can also **reserve a table for the next time** all by themselves by selecting a date and setting the number of people.

With Resto'Touch, an application for the Microsoft® Surface® multi-touch and multi-user unit, bring magic to your establishment by offering your guests these exclusive services!

Immerse your guests into the touch era thanks to this turn-key application designed at your image. High resolution photographs, videos, background soundtracks, detailed descriptions, object recognition: everything is there to further whet the appetite of your customers! Truly a participative and multi-user interface, this highly intuitive tool adapts to every guest profile.

The application includes an extranet system that gives you complete freedom for managing additions and modifications to the content of your application (dishes, wines, POIs, etc.).

We also develop tailor-made applications suited to your needs. With AFTER-MOUSE.COM, every feature is possible !
